Education

VIT Bhopal University, Bhopal,Madhya Pradesh **September 2022-June 2026**
Bachelor of Technology in Computer Science and Engineering (CGPA: 8.06)

Hindustani Kendriya Vidyalaya, Guwahati, Assam **2021**
12th-CBSE (67.8%)

St.Mary's Senior Secondary School, Maligaon, Guwahati, Assam **2019**
10th-CBSE (93.6%)

Technical Skills

Data Structure and Algorithms in Java, Python, Web Development, Java, XML, HTML/CSS, JavaScript, NodeJS
Technologies/Frameworks/Subjects: Object Oriented Programming(OOPs), Database Management System(DBMS), Software Engineering, Computer Network, MYSQL, Computer Architecture, Software Engineering, Compiler Design, Operating System (OS)

Projects

IOT Based Patient Health Monitoring April 2024

Technologies Used: Arduino, Uno, LM35 Temperature Sensor, Pulse Rate Sensors, 16x2 LCD display, ESP8266 module, C++,ThingSpeak, IoT Cloud, Mobile App (Android with Java/Kotlin)

Description: Developed a real-time health monitoring system to track pulse rate and body temperature using IoT sensors. Integrated wearable sensors with microcontroller (ESP32) for continuous data collection. Transmitted health data wirelessly to a mobile app/cloud platform for real-time alerts and visualization. Implemented threshold-based alerts for anomalies to notify caregivers instantly.

Outcomes: Enabled remote, continuous patient monitoring, reducing hospital visits. Improved early detection and intervention for cardiac and temperature-related anomalies. Contributed to efficient healthcare delivery, especially for elderly and remote patients.

Behind The Brands April 2025

Technologies Used: JSON Web Token, React-based frontend, Node.js, Express backend, MongoDb database

Description: Developed a dynamic web application providing transparency into the ingredients of everyday consumable products, integrating advanced e-commerce functionality with scientific ingredient analysis. Implemented features such as in-depth product composition analysis, allergen warnings, health implications, and ethical sourcing details to empower consumers in making informed purchasing decisions.

Outcome: Enhanced consumer awareness by providing real-time updates and educational resources, contributing to public health and environmental sustainability. Promoted ethical corporate practices by incorporating detailed ingredient analysis, allowing users to evaluate product safety and ethical alignment.

Achievements

- Solved over 150+ problems on Leetcode in Data Structures and Algorithms using Java.
- Got 5 star in Python in Hackerrank.
- Placed Among 25 teams out of 700+ teams in WWT All India Women Only Hackathon 2025.
- Participated in several hackathons, collaborating with diverse teams to develop innovative solutions under time constraints, gaining experience in rapid prototyping, coding, and presenting ideas while showcasing strong problem-solving skills, adaptability, and effective teamwork.

Extra-Curricular and Experience

- Enthusiast member of North East India club at VIT Bhopal, actively participated in organizing cultural events and festivals that celebrate the rich heritage and traditions of Northeast India, fostering inclusivity and cultural awareness on campus.
- Participated and won 1st position (gold medal) in Women's Chess Competition in AARAMBH'23 organized by VIT Bhopal.

Certifications

- Industrial IOT Markets and Security (Coursera) **December 2023**
- Cloud Computing (NPTEL, IIT Kharagpur) **May 2024**
- Indian Space Lab Winter Internship Program **December 2024**
- GenAi using IBM Waxton (IBM Career Education Program**)** **April 2025**
- Cyber Security Analyst (IBM Career Education Program) **April 2025**
- Marketing Analytics **(**NPTEL, IIT Kharagpur) **May 2025**

Additional Information

Languages: Fluent in English, Hindi, Nepali, Bengali (Limited Working Proficiency), Assamese (Limited Working Proficiency)

Soft-skills: Effective information, problem solving, collaborative, critical thinking.
